a jack-o-lantern?

A Pumpkin Patch.

Free Recycled Notepad & Pen Set

Present this coupon at any Office of The Milford Bank for one (1) FREE Notepad & Pen Set - made mostly from recycled paper! Limit one per customer. Supplies are limited.

Expires 11/30/16

For Parents: 5 Ways to Teach Kids to Be Green

Recycle: Post images on your home recycling bin of what can be recycled. Ask the child to help you sort items, "Does this go in the trash, recycling or compost?" Bring your kid along to redeem bottles and cans and put the earnings in their savings account. Use these opportunities to talk about recycling and how it helps the earth.

Reuse: Lead by example by using reusable containers and cloth napkins for school lunches, or using hand towels instead of paper towels for drying hands. Do "upcycling" crafts with your kids and talk about the benefits of using a thing more than once before throwing it away – such as less trash in landfills, and less pollution from factories.

Compost: Put fruit and vegetable scraps (cores, seeds, peels) and egg shells in a compost bin. Teach your kids that organic waste eventually will break down and become nutrient rich fertilizer to feed other plants.

Garden: Grow fruits, vegetables, and herbs in the garden (or go to a farmer's market) to teach children that fresh-grown produce (without pesticides) is healthier and tastes best. Plant a tree in the yard and chart its progress. Explain how trees and plants absorb carbon dioxide out of the air and turn it into oxygen for people and animals.

Conserve: Put up cheerful reminders around the house to turn off lights, not to waste water, and close doors when leaving a room – to help save energy and money. Be sure to thank and reward your kids for being green!
